RE: Approval of the RCRA Facility Investigation (RFI) Pilot Study Work Plan for
Former Boeing Fabrication Operations Facility at the Boeing Facility, Hazelwood,
Missouri; Permit #: MOD00818963

Dear Mr. Kury:

The Missouri Department of Natural Resources' Hazardous Waste Program (HWP) has completed review of the RFI Pilot Study Work Plan dated July 9, 2001, for the former Boeing Fabrication Operations Facility. The Work Plan was submitted to outline the planned procedures for conducting the Pilot Study at the recycling center portion of the facility. The proposed pilot study is based on the sampling results of Boeing's site characterization conducted during the Phase 2 investigation. The department hereby approves the July 9, 2001, Work Plan.

Boeing is hereby directed to begin implementation of the RFI Pilot Study Work Plan. It is requested that Boeing notify the department's HWP at least five (5) working days in advance of any planned field activities associated with implementation of the Work Plan to allow the department's HWP the opportunity to observe such activities.

The department's HWP would like to commend Boeing for the proactive approach to corrective action investigation and remediation that has occurred to date with respect to the Tract I facility. Boeing appears committed to ensuring that appropriate measures are taken to protect human health and the environment. The department's HWP looks forward to working with Boeing on
